JBV-1 Docking Station and MJF-31 Adapter

The JBV-1 Docking Station has been designed for calibration and software update use.

The MJF-31 Docking Station Adapter makes signal connections to the phone. JBV-1 and MJF-31 are used as one unit.

JBV-1 main electric functions are:

- adjustable VBATT calibration voltage, current measurement limit voltage "VCHAR", current measurement calibration current "ICHAR"
- adjustable ADC calibration voltage via BTEMP and BSI signal
- BTEMP and BSI calibration resistor
- signals from FBUS to the phone via parallel jig
- control via FBUS or USB
- Flash OK/FAIL indication

In calibration mode JBV-1 is powered by external power supply 11-16V DC. In flashing power for the phone can be taken from FPS-8 or external power supply 11-16V DC.

MJS-51 Module Jig

The MJS-51 Module Jig is used for testing of the following modules:

- User Interface
- Baseband and RF on system module

Product Code

MJS-51 Module Jig: 0770579

View of MJS-51

Figure 2: MJS-51

*Note: The nominal supply voltage for MJS-51 is +6.0 V.
The supply voltage must not exceed +12.0 V (min 5V).
Supply jig only when S1 = regulated position.

RF Attenuation values

GSM 850	0.18 dB ±0.10 dB
GSM 900	0.18 dB ±0.10 dB
GSM 1800	0.20 dB ±0.15 dB
GSM 1900	0.23 dB ±0.20 dB

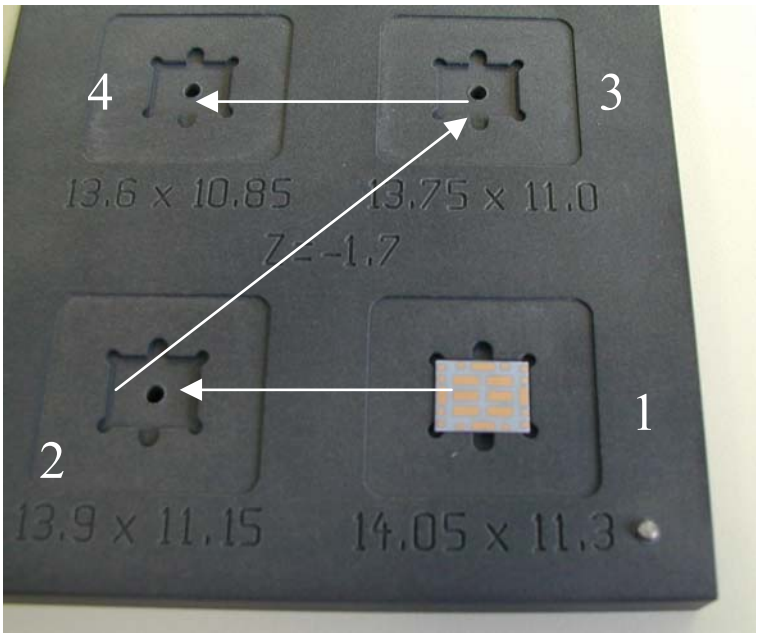
LRK-2 / 3 LGA component rework kits 1 & 2

Type designator	Description	Part code
LRK-2 (0273645) Kit 1		
MJS-76	LGA Re-work Jig	0770417
SES-2	Stencil	0770415
SPS-2	Spreader	0770471
LRK-3 (0273646) Kit 2		
SES-2	Stencil	0770415
SPS-2	Spreader	0770471

Rework procedure

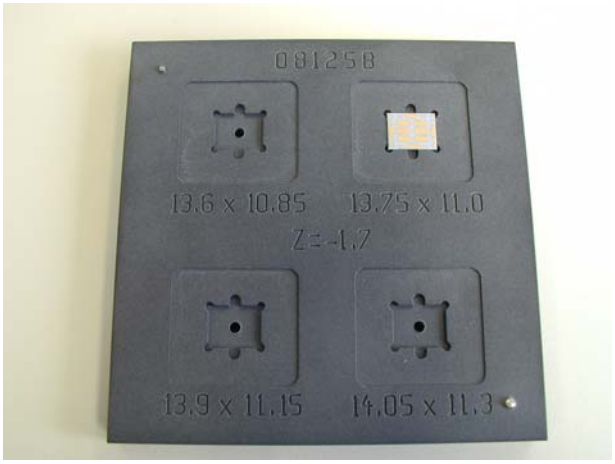
Due to the large mechanical tolerance of the power amplifiers the following procedure is necessary:

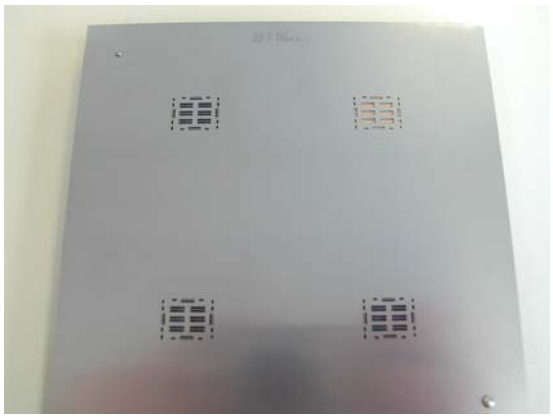
1 Put power amplifier into the MJS-76 re-work jig, the PA should be placed in the best fit location, this is determined by firstly placing it in the largest location if this is to large re-position the pa in the next size location, this should be carried out until the best fit location is found.



Copyright © 2004 Nokia Corporation
Company Confidential

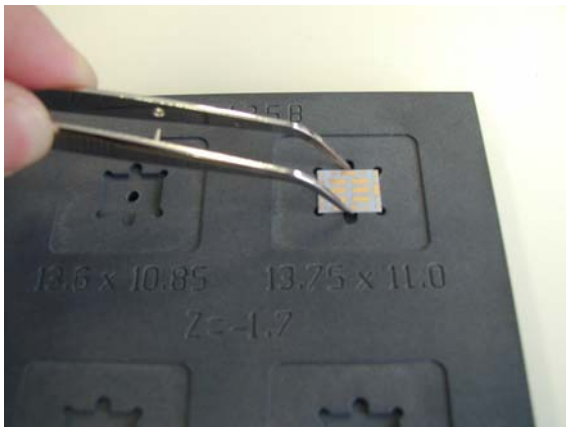
2 Once the best fit location has been found, leave the PA there and put stencil on top of the jig and PA.





3 Put soldering paste on the PA properly.

4 Remove stencil and the PA from the jig.



5 Start soldering process.

MJS-76 PA LGA re-work jig (Product code 0770417)

Introduction

This tool is used in LGA type component reworking purposes in central service centers,

Part list

Part number	Name of Part	Material code	Drawing number	Qty
1	Frame		SME5S910	1
2	Cylindrical pin 3x12	640b003		1
3	Cylindrical pin 2x12	640B012		1
4	Type label	9380601		1

FPS-8 Flash Prommer (Sales Pack)

The Flash Prommer FPS-8 is used with e.g. FLA-21 and JBV-1. Power is supplied to FPS-8 from the Universal Power Supply.

The sales pack includes:

- FPS-8 Flash Prommer	0750123
- FPS-8 Activation Sheet	9359289
- Universal Power Supply	0680032
- AXS-4 Service Cable (D9-D9)	0730090
- Printer cable	0730029

FPS-8C Parallel Flash Prommer (Sales Pack)

The Parallel Flash Prommer FPS-8C is used with MJF-6 and JBV-1. Flash programming can be done to maximum of 8 phones parallel. FPS-8C consists of eight SF11C programming cards. SF11C card is functionally identical to FPS-8.

FLA-48 POS (Point Of Sale) Flash Loading Adapter

The POS Flash Loading Adapter FLA-48 is used in place of the phone's normal battery during service, to supply a controlled operating voltage and to connect to pads which are under the SIM card.

Product Code

FLA-48 POS Flash Loading Adapter: 0770582

SW Security Device PKD-1

SW security device is a piece of hardware enabling the use of the service software when connected to the parallel (LPT) port of the PC. Whithout the dongle present it is not possible to use the service software. Printer or any such device can be connected to the PC through the dongle if needed.

Caution: Make sure that you have switched off the PC and the printer before making connections!

Caution: Do not connected the PKD-1 to the serial port.
